80 columns - 4 sec (15 cards/min)

STATINTL

519 Model I Summary Punch
(usually connected to 407 accounting machine)
(card of comparing)

What other features??

115V

No guarantee on delivery. Will
try 2/8 week.

STATINTL

60 card/minute
100 " "

5/9 - Sample card

Punch on side of card 16 char of
alpha numeric data.

Sample has all char printed out
0-1 read from card
Balance of 16 char can be printed
on edge of card.

Requirement to DPD - why needed, delivery + cost.

Numeric data only. No IBM Parallel punch + print
at same time. Have an "interpreter" - reads the
punch + prints on 60 columns. (60 cards/minute
or 100 cards/minute).

Need Print on card + machine handle card
fast enough to match reader - 1/second.

4:15-24 hr.

STATINTL Memo - [REDACTED] - if sophistication as stated
is necessary. Then equipment should go on line. Called
Ch - he hasn't seen memo - will track it down + give me answer.
